Section/Requirement	Due Date	Status
Connect to System (US-46)		
Test Server	1/31/17	Complete
Write NodeJS HTTPS Server Code	2/15/17	Complete
Create Temporary SSL Certificates for Testing	2/15/17	Complete
Database (US-120)		
Design Database	1/31/17	Complete
Create Database Tables	2/15/17	Complete
Insert Sample Date	2/15/17	Complete
Create Student Account (US-47)		
Design Page HTML + CSS	2/15/17	Complete
Write Controllers to Handle Student Account Data	2/15/17	Complete
Create HTML Shell	2/15/17	Complete
Write POST Method to Receive User Enter Information	2/15/17	Complete
Ensure Create Student Account Page has Path for Route	2/15/17	Complete
Write Code to Save Received User Entered Info in Database and Add to POST Method	2/15/17	Complete
Write Database Connection Code and Add to Server File	2/15/17	Complete
Account Creation Password Validation	2/15/17	Complete
Document Student Account Creation Process in User Guide	2/15/17	Complete
Log In (US-48)		
Design Page HTML + CSS	2/15/17	Complete
Test Logging In Student User Type, Failed Log In	2/15/17	Complete
Document Log In Process In README.txt	2/15/17	Complete
Create login HTML Shell	2/15/17	Complete
Update app.js to use Login as Default Route	2/15/17	Complete
Ensure Default Route is Appropriate After User Login	2/15/17	Complete
Inside POST Method Write Code to Validate User Credentials with Database	2/15/17	Complete
Write Code to Store Log In Time Stamp in Database	2/15/17	Complete
Write Code to Handle Invalid Login on Client Side	2/15/17	Complete
Log Out (US-51)		
Document Log Out Procedure in README.txt	2/15/17	Complete
Student Creates Application (US-63)		
Design Page HTML + CSS	3/22/17	
Document Application Process in README.txt	2/15/17	Complete
Test Saving/Re-populating Information to/from Database for Each Application Page	2/15/17	Complete

Write POST Methods for Each Application Page to Store Application Information	2/15/17	Complete
Write GET Method Code to Return Information to Autofill Application Sections	2/15/17	Complete
Create Shell HTML Fragments For Application Sections	2/15/17	Complete
Create Routes for HTML Fragments	2/15/17	Complete
Build Appropriate Controllers with Proper HTTP Methods	2/15/17	Complete
Modify Controllers to Manage Fragment (Application) Data Fields	2/15/17	Complete
Create a Student Home Page Shell	2/15/17	Complete
Add buttons to Student Home Page Shell	2/15/17	Complete
Verify JSON Data Structure to Send Via HTTP	2/15/17	Complete
Identify Data Fields on HTML Fragments	2/15/17	Complete
Add Appropriate HTML/Data Fields to Shell HTML Fragments Files	2/15/17	Complete
Student Save State and Resume Application (US-64)		
Add Code to Retrieve Last State of Application to Determine Last Page Saved by User	2/15/17	Complete
Test for Retrieving State and Routing to Correct Page	2/15/17	Complete
Add Buttons to Save and to Save/Continue	2/15/17	Complete
Document Resuming Application Process in README.txt	2/15/17	Complete
Add simple indicator to Student Landing for Continuing Application	2/15/17	Complete
Write Code to Route Student to Appropriate Last Saved Page	2/15/17	Complete
Student Edits Application (US-65)		
Test Retrieving Data and Updating Application Pages	2/15/17	Complete
Write GET Method for Each Application Page to Load Previously Entered Application Information	2/15/17	Complete
Write Code to Handle Data Field Updates	2/15/17	Complete
Add Code to POST Method to Check for Updated Information to Determine Which Information to Save/Overwrite	2/15/17	Complete
Create Application Client File Shells (US-109)		
Create Shell Header, Footer, Index HTML Files	2/15/17	Complete
Create Client Folder to House Client Files	2/15/17	Complete
Create File System to Hold HTML Fragments, Templates, and JavaScript Files	2/15/17	Complete
Authorization and User Session (US-155)		
Write User Profile Variable Methods	2/15/17	Complete
Add Client Side Handling of Token (Storage and Intercept)	2/15/17	Complete
Write Code to Route to Login After Session End	2/15/17	Complete
Add JWT Package and Token Signing Code to Server	2/15/17	Complete
Add Code to Retain Session Status	2/15/17	Complete

Develop Service to Handle Tracking User Login, Session, and Authorization	2/15/17	Complete
Call to Action Items for Student (US-169)		
Write Server Code to Return Incomplete Items	3/22/17	Complete
Write PlaceHolder Code for PC Feedback and Deadline Notice Actions	3/22/17	Complete
Write Server Middleware to Scan isComplete Fields and Missing Required Fields	3/22/17	Complete
Add Directives in Student Home to Hold Calls to Action for Each Application Page, PC Feedback, and Approaching Deadline Notice	3/22/17	Complete
Identify *Required* Fields For Application to be Considered Complete for Each Page	3/22/17	Complete
Add Fields to Database for Page Completion	3/22/17	Complete
Document Call to Actions in User Guide	3/22/17	Complete
Application Employment Page Hours (US-176)		
Design Enrollment Page Hours	3/22/17	
Add Message That Displays User Warning if Hours Too High and Disappears When Fixed	3/22/17	Complete
Create Work Hours SERVICE with Hours Check Logic	3/22/17	Complete
Add Calls From Controller/Page to Check Inputs	3/22/17	Complete
Add Fields to Database for if Student has Worked at ASU Before	3/22/17	Complete
Create Work Hour CONSTANTS	3/22/17	Complete
Update Server Employment Route to Save and Return 'has worked' Value	3/22/17	Complete
Update Employment Controller to Save and Populate 'has worked'	3/22/17	Complete
Add 'has worked for ASU before' yes/no Angular Scoped Radios to HTML Page	3/22/17	Complete
Document Employment Page Process in User Guide	3/22/17	Complete
Prevent Flash of Unstyled Content (US-188)		
Add ng-show to Main app body	3/19/17	
Add Boolean False Assignment to ng-show When Route Changes	3/19/17	
Add Resolve to routeProvider Routes that Assigns the CSS Layout and Sets app ng-show Boolean to True	3/19/17	
Add Short Timer to Minimize Assignments Affects and Blink (Whitespace)	3/19/17	
Application Page Navigation (US-172)		
Design Navigation	3/22/17	
Remove Last Save Page Logic	3/22/17	Complete
Remove Continue Application Logic for Student Controller and Student View HTML	3/22/17	Complete
Remove Database Fields LastSaved	3/22/17	Complete
Student Adds Another Item in Courses Page (US-183)		

Edit Courses Table Database	3/22/17	Complete
Insert Sample Data for Courses Table	3/22/17	Complete
Add Ability for User to Deselect Course Level	3/22/17	Complete
Remove Checkbox From Every Course and Set up Radio Buttons as Indicator of Choosing Course	3/22/17	Complete
Add Optional Course Input Along With 4 Course Levels	3/22/17	Complete
Edit Controller to Post New Information Format to Server	3/22/17	Complete
Edit Controller to Display New Format of User Entered Information When Repopulating Courses Page	3/22/17	Complete
Edit Server Router to Return New Information Format From Updated Database Table to Populate Page	3/22/17	Complete
Edit Server Route to Accept New Information Format and Store it in Update Database Table	3/22/17	Complete
Student Adds Another Item in Languages Page (US-181)		
Edit Languages, IDEs, and Tools Table Database	3/22/17	Complete
Insert Sample Data For Languages, IDEs, and Tools Table	3/22/17	Complete
Add Optional Languages Input Along With Knowledge Level on Languages Application Page	3/22/17	Complete
Edit POST Method to Store User Entered Information Into Database	3/22/17	Complete
Edit POST Method to Display User Entered Information When Repopulating Languages Application Page	3/22/17	Complete
Remove Checkbox From Every Language and Set up Radio Buttons as Indicator of Choosing Languages/IDE/Tool	3/22/17	Complete
Add Optional IDEs input on Languages Application Page	3/22/17	Complete
Add Optional Tools input on Languages Application Page	3/22/17	Complete
Add Ability for User to Deselect Languages Level to Deselect the Language	3/22/17	Complete
Check Application Status (US-50)		
Write Code to Have This Updated by Call to Action Updates	3/22/17	Complete
Add Area to Hold Application Status on Student Home Page	3/22/17	Complete
Student Availability for Upcoming Semester (US-186)		
Reduce the Availability Page to One Calendar View	3/22/17	Complete
Modify Saving/Display of Calendar Values on Client and Server	3/22/17	Complete
Remove Data Field CalendarName	3/22/17	Complete
Change Hour Range and Day Range	3/22/17	Complete
Update Availability in User Guide	3/22/17	Complete
Creating Account Regex (US-189)		
Create Regex for Password	3/22/17	Complete
Hash and Salt Passwords for Storage in Database	3/22/17	Complete

Create Code to Check Email	3/22/17	Complete
Student Attachments Submittal (US-60)		
Document Application Attachment Process in README.txt	3/22/17	
Write Code to Receive Uploaded Files and Store in Correct Area of File System	3/22/17	Complete
Modify HTML Elements to Cover Input File Type	3/22/17	Complete
Write Code to Overwrite File if Already in System	3/22/17	Complete
Test Upload File	3/22/17	Complete
Update Attachment Table Database	3/22/17	Complete
View Class Summary/Status (US-164)		
Document Class Summary Functionality in User Guide	3/22/17	Complete
Create Program Chair HTML Home Page	3/22/17	Complete
Create Program Chair User	3/22/17	Complete
Create Class Summary HTML Page	3/22/17	Complete
Create Program Chair Home Controller	3/22/17	Complete
Edit Schedule Table Database + Insert Sample Data	3/22/17	Complete
Create Enrollment Table Database + Insert Sample Data	3/22/17	Complete
Edit Placement Table Database + Insert Sample Data	3/22/17	Complete
Edit Student Request Table Database + Insert Sample Data	3/22/17	Complete
Create Student Profile HTML	3/22/17	Complete
Edit Log In to Route Program Chair to Home Page	3/22/17	Complete
Create Class Summary Controller	3/22/17	Complete
Combine Queries, Clean Server Router Code, Change Posts to Gets for Application Pages (US-270)		
Combine Queries Where Possible to Improve Efficiency	3/22/17	Complete
Change Posts to Gets for All Application Pages Using Username From Login Token	3/22/17	Complete
Move student.js to user.js and Update all Necessary Files	3/22/17	Complete
Set Application Deadlines (US-173)		
Create Deadline Table Database	3/22/17	Complete
Add Necessary Query to studentActionsRouter	3/17/17	
Add Necessary Queries for Deadline Data for PC Actions	3/18/17	
Document Deadline Process in User Guide	3/19/17	
Write Code for Student Home Page to Check Deadline Date and Display Call to Action if Deadline is Close and Application is Incomplete	3/19/17	
Update Student Home Page to Show Current Active Deadline and Deadline Message	3/19/17	
Write Server Code to Return Current Deadline to PC Page and Store Deadline info in Database	3/18/17	

Create Form to Allow PC Deadline Input	3/18/17	
Add Empty Route to Store Deadline to programChairRouter in Order to Add Query Variable.	3/17/17	
Add Initial PC Actions Server Route for Queries	3/17/17	
Clean up CSS Code (US-278)		
Check all Application Pages CSS for Unnecessary Code and Remove	3/22/17	Complete
Make all CSS Files Consistent From File to File	3/22/17	Complete
Add Faculty/Administrative Users (US-166)		
Document Creating Faculty/Admin Accounts in User Guide	3/22/17	
Create Link on Program Chair Home Page to Add Faculty and Admin Accounts	3/22/17	Complete
Create Page to Add Faculty and Admin Accounts	3/22/17	Complete
Create Admin Home Page and Routing Upon Log in	3/22/17	Complete
Create/Edit/Delete Student Request and View Assigned Students (US-52)		
Faculty View Student Applications (US-177)		
Call to Action Items for Admin (US-182)		
Assign Student to a Class (US-162)		
Call to Action Items for PC (US-160)		
PC View Student Applications (US-165)		
Run Class Reports (US-62)
